PROJECT EXPERIENCE

- 1. **E-Commerce Website** (React, Next.js, Appwrite, Tailwind CSS)
- Built a full-fledged e-commerce platform with user authentication, product listing, cart management, and order tracking.
- Used Appwrite for backend services (database, authentication, and storage).
- Improved page load speed by 30% and reduced bounce rate by 15% through UI/UX optimizations.
- 2. Food Delivery Website (React, Node.js, MongoDB, Tailwind CSS)
 - Developed a responsive food ordering platform with secure user authentication, real-time order tracking, and payment integration.
 - Optimized UI/UX, increasing user engagement by 20%.
- 3. GPT Clone App (React, Node.js, OpenAl API)
- Created an Al-powered chatbot that provides real-time conversational responses using OpenAl's API.
- Implemented fine-tuning for improved response accuracy and performance.
